## Knowledge for the world of tomorrow.

We are Siemens Digital Industries Software. We are not a manufacturing company. We are a growing software company - bringing the technologies and innovations of tomorrow to our customers today. With the resources and opportunities of a large corporation, your opportunities are endless. The role you apply for today, is only the first step in your Siemens journey.

Join our team as **“Export Control Business Partner / Classifier**

**This is a global position that can be performed in general inside Germany, Ireland or any other European country.**

## What part will you play?

- Collaborate with assigned businesses (legal entities, etc.) to communicate internal export control requirements and ensure adherence to obligations under applicable law and the Siemens Internal Control Program (“ICP”).
- Provide regular communication and training to the assigned businesses on relevant export control topics.
- Perform and record periodic export control spot checks, and work with the business to remediate issues identified.
- Resolve export control classifications (ECCN, AL, other) for software and hardware products.

- Perform de-minimize calculations to identify products that are subject to the EAR.
- Review and resolve export control issues.
- Document and implement technology control plans as vital.
- Coordinate with other members of the DI SW Export Control team, as appropriate, to intensify and resolve export control related matters.
- Report to management on Export Control related topics relevant to the businesses supported.
- Resolve Export Control critical issues and implement approvals for certain higher risk transactions.
- Proven understanding of US export control regulations / EU export control regulations
- Proven track record to resolve export classification of items
- Strong written and verbal communication skills
- Confirmed project management skills; including analytics, metric measurement and continuous monitoring expectations and deliverables
- Ability to communicate, negotiate, influence and implement changes within the business
- Capable of working and influencing remotely and across country lines
- Independent worker, thrives in an “Ownership” culture
- Change agent - accept change, externally and internally driven, and facilitates or drives vital changes in the business

**What you need to make real what matters.**

- Bachelor’s degree or equivalent of education and experience in related field
- Experience in Export Control
- Proven understanding of US and EU export control regulations
- Proven track record to classify items on the CCL and EU Dual Use Vo
- Strong written and verbal communication skills
- Validated project management skills; including analytics, metric measurement and continuous monitoring expectations and deliverables

- Ability to communicate, negotiate, influence and implement changes within the business
- Capable of working and influencing remotely and across country lines
- Independent worker, thrives in an “Ownership” culture
- Change agent - accept change, externally and internally driven and facilitates or drives required changes in the business

### **What else do you ideally bring with you?**

- Strong understanding of the Software industry
- Experience working with ERP systems (i.e. SAP, Oracle, other)
- Showed strength with MS Office
- Understanding of Siemens Internal Control Program, a plus

### **We'd love to hear from you, so apply now on [siemens.com](https://www.sw.siemens.com/)!**

We look forward to your application! Please use only our career platform, which you can access via "Apply now".
