All-in-all I really loved this conference. I haven’t been to a good one like this, ever. Really useful information and I will be returning in the future!

Sharron Cook’s presentation is consistently the most impactful part of the conference. What sets her apart is her focus on practical application. She walks through the exact steps companies must take to stay compliant. For instance, her guidance on navigating the BIS website and working through mock license requirement scenarios is especially valuable and directly applicable.

“This conference is vital if your company is involved with international shipments of any kind.
So much information and resources in attendance that is good to have in your pocket for any future inquiries or situations.
Was a pleasure to attend!”

"This course provided practical, real-world examples of how regulations apply to daily business, delivered in a personal, professional, and engaging format. It is incredibly rewarding to have your confidence in your skillset restored while staying current with the ever-changing import/export landscape. You will leave with a brain full of solutions to complex requirements and the opportunity to engage directly with contacts at the Commerce and State levels. Well worth the investment for the practical answers provided—if you only attend one conference this year, make it this one."

"Finding humor in the compliance world is a treat! I really valued hearing directly from the Commerce and State professionals about their experiences working with us—it's a great reminder of the partnership behind the regulations."

"Ailish NicPhaidin was a gracious and entertaining facilitator. She made the presenters feel like individuals rather than just speakers, bringing a human touch to the session. Her kindness and courtesy toward everyone made for a truly welcoming atmosphere."

Partnering for Compliance is truly a partnership.

It provides a unique opportunity for us (industry) to meet with and ask direct questions to the government regulators.

I have attended this conference since its inception almost 2 decades ago. I learn something new every time and I am never disappointed.

This conference also provides a great opportunity to network with others in our industry.

On a final note...it is a lot of fun.

I always appreciate the chance to connect with the broader trade compliance community.

With how quickly the global trade landscape is changing, the discussions and insights are incredibly valuable.

Hearing directly from experts and regulators provides perspectives you simply can't get at most other conferences.
